

## News & Commentary

Last Updated Wednesday, 13 September 2006

This site offers news, information and Dr. Davidoff's comments about current happenings in the dental implant industry.

There's lots of "STUFF" going on all the time in the implant field: New products, meetings and seminars and breakthrough techniques occur practically every day. This site is designed to help keep you up to date on what is happening and to give me an opportunity to speak out about what I feel is right or wrong in the industry as a whole. I will try to keep this section as interesting as possible and I will look to update frequently. If any of you have information that you would like published in this area, please do not hesitate to let me know about it and I will get it up and running real quick.

The "commentary" section is very very opinionated, based on MY observations. If anyone would like me to publish a response to one of my commentaries, please send it to me and I will publish it without any editing. Fair is Fair...

You can go directly to my Pet Peeves section or use the Table of Contents to the left to select an area to travel to and when your finished, click the Home Page button to get back to the main page. Enjoy.... SRD
